# Filling Nozzle Kit

## Using the correct nozzle for best results

Depending on the product you will need to change filling nozzle. Norden is readily available to assist you in achieving the best results for your tube filling. The three types of nozzles included in the kit is described below. All three types are in available diameters from 13-42 mm.

Get better results with less equipment! Contact your customer service representative today.

### Blow-off nozzle

Norden standard blow-off nozzle is the most widely used on the market amongst Norden tube fillers.

The blow-off type nozzle is compatible with a wide spectrum of products, including ointments, suntan lotion, grease, gels and food.

### Cut-off nozzle

Use it for stringy or foamy products such as bubble bath liquids, soaps and silicones.

### Combined Cut and Blow Nozzle

The combined cut and blow-off nozzle is used for products where a combination of a sharp cut combined with an air jet is required.

### Available diameters

Diameters from 13-42 mm

Step by step assembly instructions to be found on Nordens' YouTube-channel.
