

## Effortless changeovers

---

Quick and easy changeovers are vital to maintaining a demanding yet efficient production schedule. To continue providing you with the parts necessary to achieve this, we have developed a lightweight filling pump.

This pump is half the weight of our standard pump, which means that you can make faster changeovers because the pump is easier to remove and mount. It comes complete with a lightweight pump house, cylinder, valve, sleeve, and piston assembly.

The lighter weight also means less physical strain on your employees, resulting in easier pump cleaning and changeovers, as well as increasing your production efficiency.
