

TUBE TRANSPORT UNIT

a coesia company

Secure full speed ahead
quietly, accurately and durably

Polyurethane belts have been available for many Norden machines for the last 15 years. However, our machines are workhorses and many older ones are still going strong. If the steel band or other parts are worn out, replace them with our Tube Transport Unit, which means you upgrade your machinery with premium parts that allow you to maintain a high production output.

BENEFITS

- Highly durable
- Reduces downtime
- Less maintenance
- Reduces noise

Tube Transport Unit

Benefits your production, benefits your business

Our Tube Transport Unit replaces steel bands so that your machine can run to its full potential for many years to come.

The polyurethane belt does not stretch over time and is extremely durable even on high-speed production lines. In fact, we have not had a single break since we introduced it more than 20 years ago. This translates into reduced downtime, maintenance and costs.

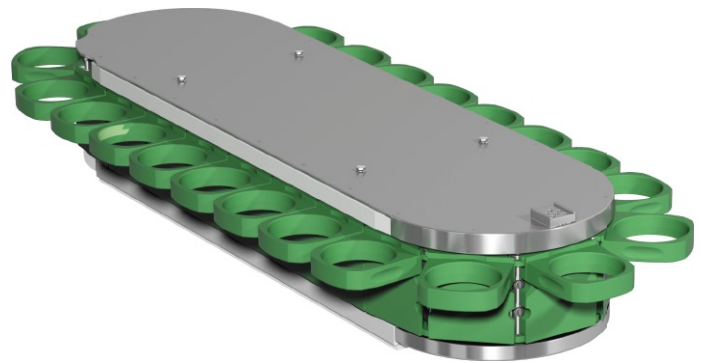

The Tube Transport Unit transports the tubes smoothly and quickly, and stops instantly when required. The polyurethane belt also reduces noise considerably, which means that working conditions improve, which in turn results in a happier and healthier work force.

A comprehensive unit

Our service technician will alert you when it is time to upgrade to the Tube Transport Unit and take care of the installation. Exchanging parts and conducting test runs takes two days.

The unit includes:

- Polyurethane belt
- Belt pulleys
- Tube holder links
- Link and SLBF bushings
- Screws, bearings and sealing rings
- Upper and lower guide rails
- Corner guide
- Mounting hardware

Each part of the Tube Transport Unit has been tried, tested and approved by Norden for performance and quality. When installed, it is integrated to work in unison with the other functions of the machine.

With you for the long run

Norden is committed to providing evolving functionality of your filling systems. Through our quick hardware supply, reliable service and maintenance, and extensive global reach and local presence, we can constantly enhance your productivity according to your needs.
